

## **Cristina Ferrare To Host New Infomercial**

*By inLife LLC*

*Dated: Dec 06, 2010*

*inLife, distributors of science-based Health/Wellness products today announced that a new infomercial hosted by TV personality Cristina Ferrare will begin airing Dec. 28 and will feature inLife's new ground-breaking immune building product, inForce*

Irvine, California- inLife LLC, distributors of science-based Health & Wellness products today announced that a new infomercial hosted by TV personality Cristina Ferrare will begin airing December 28 and will feature inLife's new ground-breaking immune building product, inForce. "We are very excited to be working with Cristina Ferrare as our infomercial host", stated Craig Youngblood, CEO and Founder of inLife. Worldwide there have been over 400 animal and human studies on inForce's main ingredients PSK & PSP, extracts of the Coriolus versicolor mushroom, which have also been the subjects of over a dozen placebo-based human trials conducted in the west.

### **About Cristina Ferrare**

Cristina is a talented television personality and bestselling author on women's health issues, style and healthy family living. Cristina is also the star of her own cooking show "A Big Bowl of Love" on the new Oprah Winfrey Network. The show will air 3:30 PM (M-F). Cristina states that "inForce is the best all-natural product I've found to keep me and my family safer by boosting our bodies' immune system."

### **About Coriolus Versicolor**

The Coriolus versicolor mushroom is one of the most widely studied immune building supplements. Worldwide, there have been over 400 animal and human studies on PSK & PSP, both polysaccharide extracts of the Coriolus versicolor mushroom with over a dozen placebo-based human trials conducted in the west. Traditionally, the Coriolus versicolor mushroom (known as Yun-zhi or cloud mushroom in China) has been used in China for several thousand years because of its immune boosting capabilities. In the 1980s, Dr. Yang conducted further studies and was able to isolate a much more potent strain using a different, alcohol-based extraction process. The result was Polysaccharopeptide or PSP. In the United States, top-ranked hospital and research institutes have reported that Coriolus versicolor helps boost the body's immune system with limited side effects and safety of daily oral doses for extended periods of time. In addition, Coriolus versicolor and its potential positive effects has been studied very closely by M.D. Anderson, University of Texas, Loma Linda University, Beth Israel Deaconess Medical Center (a teaching hospital of Harvard Medical School), The University of San Diego, Sloan-Kettering Center (New York), and Bastyr University (Kenmore, Washington), just to name a few.

### **inLife Immune Builder with PSP and PSK**

inLife offers Coriolus versicolor as a Daily Dietary Supplement in capsule form to help maintain and stimulate the body's immune system. Coriolus versicolor and its high-potency extracts, PSK and PSP are among the most widely studied supplements for their immune building properties and the incredibly positive results of these studies are compelling. InForce Immune Builder is a proprietary blend of both Polysaccharide-K (PSK) and Polysaccharopeptide (PSP). Both offer valuable immune building assistance and can be taken on a daily basis. The products are bottled in the United States in an FDA registered bottling facility that is CGMP compliant (Current Good Manufacturing Practices).
